The company:

Moving on, thinking ahead, advancing - with Naturin Viscofan GmbH.

Viscofan BioEngineering is a division of Naturin Viscofan GmbH - a company of the Viscofan Group. Viscofan has developed a collagen hydrolyzate of exceptional quality for the health food industry. The company offers bovine collagen peptides on an industrial scale for a variety of applications as nutraceuticals, nutricosmetics or organic food additives. All production steps from COLLinstant®Halal to ready-to-use hydrolyzate powder comply with the regulations of the World Halal Food Council (WHFC) and the end product is certified by an accredited WHFC representative. A dedicated international team covers the entire value chain from research to development and sales of new collagen products. At the next possible date, our client is looking for:

Scientist as Sales Manager (m/f/d) hydrolyzate national/international with focus on Middle East/Asia

Location: worldwide – home office
Project number: PF611H

Your tasks:

The task in the international environment is a challenge to proactively promote the further development of the new business field collagen peptides as food supplements. In your function, you are responsible for the acquisition of new customers, the support of the distributors in Europe and with a focus on the development of the regions of the Middle East and Asia. You are also in authority on products with halal certificates including implementation. You enjoy a high level of travel, take part in national/international trade fairs and develop individual marketing concepts.

The requirements:

Due to the requirements, you need a degree in science (chemistry, biology, biochemistry) or food technology. You are currently active in the field of industrial manufacturing in the food supplement/food industry and ideally have a valid network in the Middle East. Selling is fun, you are motivated to convince other people of your product and are looking for success. You think and act based on opportunities and solutions, are determined and react flexibly to changing customer requirements. Very good English skills, good Arabic language skills and good German skills round off your profile.

Interested?

Then look forward to the task in an international environment with the latest product technologies and varied tasks with plenty of scope.

Please send your application documents, specifying the code number PF611H, as a .doc or .pdf file to bewerbung@falkenstein-personalberatung.de. Mr. Falkenstein and Ms. Kadzioch will be happy to provide you with further information by phone at +49 6204 9133-15. Confidentiality is guaranteed!

Data protection:

The protection of your personal data is very important to us. By sending your application documents, you give us the declaration of consent to save your personal data on a project basis. After the end of the project, your data will be completely deleted in accordance with the DSGVO. Further information is available at: [Datenschutzerklärung Falkenstein Personalberatung](#).
